1 Introduction

I am a creative , disciplined , dedicated tech- savvy currently working as Android Developer who likes to engage with new technologies which are combinations of software and electronics like Internet of Things , Robotics , AI and Computer Systems. I have also reasonable knowledge in Internet of Things and huge knowledge in Programming, Data Structures and Algorithms. Due to few of personal interest I used to do some online programming on websites like freeCodeCamp,Hacker Rank etc. I mostly used to stick with internet and computer systems.For refreshment you see me playing with kids,watching web/TV series,playing mobile games.
